

Signed numbers.

$$a=4, b=-4, c=0, d=-1, k=5, m=\frac{1}{2}, x=-\frac{1}{3}, y=0.1, z=-0.1$$

Use the values assigned to each of the above variables.

Gettin' zeroes. Add a number to the given value to have a sum of 0.

$$1) a + \underline{\quad} = 0 \quad 2) b + \underline{\quad} = 0 \quad 3) d + \underline{\quad} = 0 \quad 4) d + \underline{\quad} = 0$$

$$4 + (-4) = 0$$

$$5) k + \underline{\quad} = 0 \quad 6) m + \underline{\quad} = 0 \quad 7) x + \underline{\quad} = 0 \quad 8) y + \underline{\quad} = 0$$

$$9) a + b + \underline{\quad} = 0 \quad 10) a + d + \underline{\quad} = 0 \quad 11) d + k + \underline{\quad} = 0 \quad 12) z + k + \underline{\quad} = 0$$

Now just add or subtract. Substitute values for the variables from the list above.

$$13) 10 + d = \underline{\quad} \quad 14) k + (-5) = \underline{\quad} \quad 15) y + (-5) = \underline{\quad} \quad 16) z + (-5) = \underline{\quad}$$

$$17) z + y = \underline{\quad} \quad 18) y + z = \underline{\quad} \quad 19) a - b = \underline{\quad} \quad 20) b - a = \underline{\quad}$$

$$21) b + d = \underline{\quad} \quad 22) b - d = \underline{\quad} \quad 23) b + (-d) = \underline{\quad} \quad 24) c - b = \underline{\quad}$$

$$25) d + c = \underline{\quad} \quad 26) m + k = \underline{\quad} \quad 27) k - m = \underline{\quad} \quad 28) k - b = \underline{\quad}$$

$$29) a - b = \underline{\quad} \quad 30) m + x = \underline{\quad} \quad 31) \frac{2}{3} + x = \underline{\quad} \quad 32) x - \frac{2}{3} = \underline{\quad}$$

$$33) 1.1 - z = \underline{\quad} \quad 34) x - 1.1 = \underline{\quad} \quad 35) a + b - d = \underline{\quad} \quad 36) x + \frac{1}{6} = \underline{\quad}$$

$$37) a + d - b + z = \underline{\quad} \quad 38) z - y + d = \underline{\quad} \quad 39) c - b - a = \underline{\quad}$$

$$40) m - \frac{1}{4} = \underline{\quad} \quad 41) m - x = \underline{\quad} \quad 42) 1 - y = \underline{\quad} \quad 43) z - 1 = \underline{\quad}$$

44) Write a number sentence using a, b, d and a number so that the sum is -1.
